27-month Plan of Study

Many of our students are working full-time while they pursue the degree, and prefer to take just one course per quarter. The following plan of study can be completed in just 27 months. It calls for taking just one course per quarter for 8 quarters, and then "doubling up" to complete the degree in a final 9th quarter.

Quarter 1: ECON 643 Empirical Analysis I
Quarter 2: ECON 644 Empirical Analysis II
Quarter 3: ECON 645 Empirical Analysis III
Quarter 4: ECON 642 - Macroeconomic Analysis
Quarter 5: ECON 641 - Microeconomic Analysis
Quarter 6: ECON 672 - Program Analysis and Evaluation
Quarter 7: ECON 671 - Economics of Health Care
Quarter 8: ECON 673 - Information, Game Theory and Market Design
Quarter 9: ECON 674 - Economic Analysis of Law, and ECON 675: Environmental Economics

Students who would like to follow a different plan should consult the program's director to minimize the potential for unexpected complications.
